

Satellite radio provides wonderful variety of 100 channels of programming, including up to the minute news via such channels as CNN, CNBC, ABC News. It's a wonderful service as you drive across this country. This new bill to support local radio, mostly NAB members, is not progress but an attempt to stifle satellite radio and competition.

Please do not stifle satellite radio. XM provides fantastic service and it's becoming the "must have" new technology. Thanks for listening,
Thomas Dahl, McLean, VA 22101
